

DEVICE FOR LIMITING ACCESS TO A CONFINED SPACE

ABSTRACT

- 5 In order to increase the security of devices (26) for limiting access to a confined space (32, 34), such as banknote dispensers, the latter are fitted with locks (40, 42, 58) and a coordination device (54), each lock being connected to said device.
- 10 The devices together form a network controlled by a computer (28). The computer (28) controls the opening of the lock (40, 42, 58).
